STUDENT COMPANY

Loutáci

Making the world a better place to live...

Introduction

Ladies and gentlemen,

We present to you the annual report of the company Louťáci.
In this report, we analyze the operation of our company in the past year.
The non-profit organization JA Czech enabled us to establish our own student company, in which we can manage it's operation for a period of one year.
Working in the company taught us self-sufficiency, working on a set time limit and how to manage our finances.
Furthermore, this program allowed us to gain new experience, especially in the field of business, product promotion and design.
These skills will certainly come in handy in our future professional life.

I would like to thank the members of the company for their commitment and professionalism.
Also I would like to thank all the sponsors, promoters, organizers of conferences, seminars, competitions, workshops and our school for their help and support.
I believe that this was a great experience and lesson for the whole team, which other people often do not have the opportunity to learn.

Vítězslav Bulva, Company manager
